Reasons for Allowance

The independent claims recite message storage and redelivery systems and limitations for the following:

If a digital voice answers the telephone of step F, determining if the digital voice is an automated attendant answering system (AAA), a voice mail system (VMS), or an automated answer machine (AAM)"

The prior art of record teaches message storage and redelivery systems and detecting when a person or device answers a call. The prior art of record is different because it does not teach determining whether an AAA, VMS or AAM is the device which answers a call as recited in the limitation. New search updates revealed no other prior art which teaches the limitations in the context of the claims. Therefore, Claims 1,3,5-15,17-20,22-23 are indicated allowable.
